

## User trail segment information

### Radio Flyer Loop Trail

#### Narrative

The Radio Flyer Loop Trail starts from a junction with the Summitview Trail. The loop begins and ends at this intersection. Going east the gently rolling route travels about a mile before heading north toward the Canyon. After travelling about a quarter mile through the typical shrub-steppe habitat, it turns to the west toward an intersection with the Lone Pine Trail which comes up from the Canyon. Following west from there, the route continues to be gently rolling, eventually passing the historical Radio Flyer wagon for which it is named.

#### Trail length (and terrain)

1.97 miles of flat and moderately rolling grade.

**Difficulty: Moderate**

#### Trail uses

Hiking, skiing, snowshoeing, biking and horseback riding
